

INDUSTRY PROPOSAL

Baking has always been my dream and my true passion. And I always wanted to go into bakery companies or develop mine. I have a mindset to go for both the bakery business and also a web developer. My idea for my bakery is to create a haven, with varieties, tasty pastries, and food for those who appreciate the art of baking and enjoying homemade foods. I am going to create a warm and inviting space where customers feel comfortable and welcomed breathing in the aroma of freshly baked pastries and food types filling the air. Using only the finest and freshest ingredients, to prepare foods, and pastries for people. I will strive to blend different traditional recipes and foods with innovative flavors, offering a diverse selection of sweet, savory, tasty recipes, to make people feel they are at home. Having a taste of your home food brings back memories. My website will not only showcase our creations but will also share the love and dedication we pour into each one. It is my goal to make people happy, bringing a smile to their faces and for them to be forever happy. While being a web developer, I will help people to create their websites.

Thank you.
